

Construction / General Industry: Standby Rescue Objectives @

m Authorization				
y Signature		IC / Supervisor		
erational Safeguards & Rules of Engagement				
Check Knots are Dressed, Saftied & No Excessive Acute Bends	Pre & Post Tension Sys & Verify Resultant Each Ti			
Check Hand Signals, Radio Battery, Channels and Commands	Equipment is Hobbled, Pinned, Levele			
Carabiners Locked Down and In According to System Design, Anchors and	Loads House Keeping in Work Area			
Multi Point Anchor Span ≤ 2X Resultant Distance; (Interior Angle 90°, 715	Load Share) Manipulate the Haul fie			
Critical Point Test: Equip Redundancy & Sys. Strength for Dynamic System Safety Factor Interch				
Whistle Test: System Arrests without Personnel Hands on Rope or Equip	ment	nt Pad Friction Poin		
Extraction & Transfer Within Footprint, Bisecting Legs & Guying System ((Front, Back, Both Sides)	Redundancy		
If Multi Point Anchor Vectors are >18", for Redundancy Safeguards;				
(1)Attempt to Make Belay Rope Load Inline with Main Line P	rojected Resultant			
(2)Use a Locking Hitch at MPA Carabiners to Prevent Dynami	c Load Shifts in Case of Catast	rophic Failure		
ay System				
Self Rescu	e			
Entrants must report any near miss, injury, illness symptom or need for	rehab. Allow for air consump	tion. Energy, etc to make a safe		
egree. Also be mindful of house keeping to keep e	xit free of congestion and ento	anglement.		
5 · · · · · · ·				
External Res	cue			
It is recommended / mandatory that entrant wears a tag line while perfo	orming work within the confin	ed space for rapid extraction due
