

## CONFINED SPACE ENTRY LOG

You should be thoroughly familiar with the following duties when you assume the responsibilities of standby for a person or persons working inside a vessel or confined space. Contract attendants, entrants, and supervisors must have HASC Training (or equivalent) or In-House ITCS Training.

1. The safety of personnel working in the vessel or confined space.
2. Maintaining the conditions and requirements listed on the permits.
3. Evacuating the vessel if you observe any condition that you consider hazardous.
4. Getting help if an emergency develops. NEVER ATTEMPT TO ENTER A CONFINED SPACE - EVEN IN AN EMERGENCY. CALL FOR HELP VIA RADIO or HORN THEN A NON-ENTRY RESCUE ATTEMPT MAY BE MADE.

The circumstances and conditions of the job will determine the safety requirement and what your standby duties are. However, the following duties are basic to all jobs:

1. Do not leave your assignment while personnel are inside the vessel of confined space. If other duties require you to leave our standby post, have all the personnel evacuate the enclosure.
2. If you have any questions regarding your job, check with our supervisor.
3. Be alert. Try to anticipate and prevent any conditions that would be hazardous.
4. Prevent the fouling of airlines and/or lifelines.
5. If you are required to have respiratory equipment and lifelines, be sure you know how to use this equipment.
6. Upon completion of the job, clean and return all equipment to its original location.
